Md. Natik Alam Bhuyan Tahsin
Front-End Developer

Objective:
Passionate and dedicated Front-End Developer with a strong commitment to excellence, unwavering work ethic, and contagious enthusiasm. Determined to take on a challenging role, utilizing my passion and proficiency as a Front-End Developer to produce outstanding web applications.

Skills & Technologies:
Expertise: HTML5 | CSS3 | JavaScript | Bootstrap | Tailwind
Comfortable: React JS | Rest API
Familiar: Node.js | Express.js | MongoDB | Firebase | Stripe | JWT | TanStack Query | Axios
Tools: VS Code | Github | Vercel | Netlify | NPM | Chrome Dev tool
Soft Skills: Self-Learning | Team Person | Hard Work | Adaptability | Determined

Projects:

1. Harmony Academy   **Live Site** | Github > **Client** | **Server**
Harmony Academy is a full-stack react web application focused on Music school.
- Only registered users can access different classes.
- Users can be distinguished based on roles such as admin, instructor and student. Each has a different dashboard.
- Only Admin can manage users' roles and can determine whether a class can be approved or denied and gives feedback to a class. Instructors can only make or edit a class.

Technologies Used: React Js | React Router | TanStack Query | Firebase | Axios | Swiper Js | Tailwind | Daisy UI | Node.js | Express.js | MongoDB | Stripe | JWT | TanStack Query

2. Action Zone   **Live Site** | Github > **Client** | **Server**
Action Zone is a react web application focused on comic toy shops.
- Users can see all toy lists but only registered users can show toy details.
- Only registered users can add, delete or edit a toy.
- Users can show the list of toys from low to high price or high to low price.

Technologies Used: React Js | React Router | Fetch Api | Firebase | Aos | Swiper Js | Tailwind | Daisy UI | Node.js | Express.js | MongoDB

3. Sushi Savvy   **Live Site** | Github > **Client** | **Server**
Sushi Savvy is a react web application focused on providing food recipes to users.
- Users have to register or log in to show different chefs' recipes.
- Users can register to create new accounts.
- Users can log in using their Gmail or Github account.

Technologies Used: React Js | React Router | Firebase | Fetch Api | Swiper Js | Tailwind | Daisy UI | Node.js | Express.js

Education:
BSC in Information And Communication Technology at Comilla University.   (2012-2018)

Languages:
- Bangla (Native)
- English (Comfortable)
